
Quality policy

Poweltec, founded in 2007, is an independent service company dedicated to the improvement of oil and/or gas field production through the use of polymer technologies.

Thanks to its offer of chemical products and its constant action to fulfill customer satisfaction, Poweltec is today considered as one of the leaders in its sector.

For this reason, we have decided to commit to a continuous improvement approach by certifying ourselves to ISO 9001 version 2015.

To achieve this goal, we are committed to:

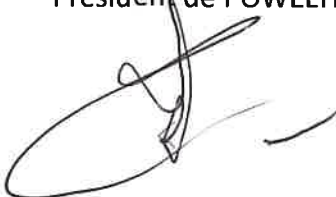

- Develop and promote the use of innovative technologies to enhance our attractiveness to our customers, our relevant stakeholders in order to meet their expectations now and in the future.
- Contribute to the maintenance and enhancement of in-house skills
- Ensure the efficiency of commercial and technical activities (Laboratory and Simulation)
- Periodically ensure that the quality system enhances customer satisfaction and the conformity of the products and services.

The implementation of our quality policy must ensure that we achieve our priority objectives in line with our commitments, and satisfy applicable requirements.

We mobilize our employees and suppliers, according to their assigned responsibilities, to implement our processes and contribute to improving customer satisfaction.

In return, we will ensure that the necessary resources are available at all levels.

Alain Zaitoun
Président de POWELTEC

Nazanine Salehi
Directrice Générale de POWELTEC
